

Have you ever wondered how the community’s vision for Chapel Hill gets transformed into action?

One important way is through the land development code, where ideas from the Chapel Hill 2020 Comprehensive Planning process become regulations for buildings, streets, parking, lighting, signs, landscaping, uses... and the list goes on.

Would you like to get involved?

If so, please start by joining us for the Kickoff event on Tuesday, September 24th. For details about this and other upcoming land development code events, see the information below.

Please help us spread the word!

If you know of someone that might be interested in this project, please consider sharing this information.

Click [here](#) for more information about the project.

<p>Sep 24 (7:00 PM) Land Development Code Kickoff Event The Town will host a Kickoff event to introduce the land development code update to the community.
