

Conference on the
**Role of Copyright Registries
in Global Digital Networks**
20th May 2009 | Madrid, Spain

Safe Creative has the pleasure to invite you to the **Conference on the Role of Copyright Registries in Global Digital Networks**, that will take place in **Madrid**, on Wednesday, **20th May 2009** at **IESE Business School**.

The main purpose of this event is to discuss the challenges that creators and rightholders are facing in the context of the Information Age, and the role that Copyright Registries can play with respect to the information that is contained in their data bases.

The Spanish Ministry of Culture will open and introduce the Conference, giving then way to the different speeches by World Intellectual Property Organization representatives, European Commission and Spanish Universities.

Once the conference is finished, and after the provided lunch, a workshop will take place culminating the event with the setting-up of a round table with the participation of content creators and different copyright related agents.

Hoping this will be of your highest interest and use, wish to count with your assistance.

Sincerely yours

You will find the program and more information at
www.semanticcopyright.org

Please, we encourage you to confirm your presence sending an email to
conference@safecreative.org before **May 5th 2009**.
