

POLLINATOR PARTNERSHIP

U.S. Bee Buffer Participant Questionnaire

Thanks for your interest in helping honey bees! The U.S. Bee Buffer Project is an exciting project with a goal of influencing 6,000 acres positively for honey bee habitat.

A honey bee seed mix will be provided at no cost to plant Bee Buffers. The U.S. Bee Buffer Project will create foraging habitat of pollen and nectar sources, essential to honey bee health.

Please take a moment to fill out this brief participant questionnaire:

Name:
Phone Number:
Email Address:
Total Operation (in acres):
Size Available for Bee Buffers (in acres or fraction thereof):
Street:
City:
County:
State:
Zip Code:
Latitude:
Longitude:
Soil Type:
Crops Grown:

Participation in other pollinator programs: y/n
If yes, please tell us the name of the program:

Are you interested in other natural resource issues? Check all that apply.

- Soil and nutrient retention
- Water quality
- Wildlife habitat
- Water availability
- Other: Free text box to fill in

Do you have the following tools (select all that apply):

- Broadcast Seeder
- Drill Seeder
- Tractor

Can you seed in the fall and/or spring? y/n

Do you use pesticides (including herbicide)? y/n

Reminder:
